"AS THE EARTH MOVES "

Thank you card from Rio Grande High School !

Thank you card from APS!!!

Unpacked, the Rio Grande High School Gymnasium project included 36 miles of block and brick, 1.08 miles of vertical drilling, and enough solar energy production to power 19.3 homes.

Together, you and 44 specialty subcontractors and suppliers created a 75,058-square foot gymnasium and athletic complex built to soar with the Ravens!

With credit to your team, the project was awarded the Eagle Award at the 2022 ABC Excellence in Construction Awards in October.

It took a team to deliver a project of this size and scale. On behalf of the entire Thompson Construction, Inc. (TCI) crew, thanks for bringing your best to the job.

We are always thankful to have Frank's to this team! Thanks for all of your hard work! -- From all of us at TCI

Transportation Bus Depot projects.

It has been a privilege working with such a dedicated team to facilitate the new Operations & Maintenance Buildings serving Albuquerque Public Schools' Student Transportation Services. We hope to work together again soon.

Warmest Regards,

W. Hoffman
D. Courteiller
